Display import/require package size in the editor

[Install](#) [Trouble Installing?](#)

[Overview](#) [Version History](#) [Q & A](#) [Rating & Review](#)

Import Cost VSCode Extension

This extension will display inline in the editor the size of the imported package. The extension utilizes webpack in order to detect the imported size.

Features

Calculates the size of imports and requires. Currently supports:

- Default importing: `import Func from 'utils';`
- Explicit require importing: `const { uniqueId } = require('utils');`

Categories

Import Cost

It displays the size of the imported package in the editor. It utilizes webpack in order to detect the imported size.

The image shows a code editor with two panels. The left panel contains JavaScript code for email validation. The right panel, titled 'emails.txt', shows a list of email addresses with line numbers 1 through 8. The email addresses are: 1. name@domain.com, 2. (empty), 3. name.2@domain.com, 4. (empty), 5. name-3@sub.domain.com, 6. (empty), 7. name-4@sub-2.domain.com, 8. (empty). The email addresses are highlighted in yellow.

```
..  
emailRegex = /^[\\w-]+@[\\w.]+/gm;  
  
isValidEmail(input) {  
  return emailRegex.test(input);  
}
```

emails.txt

```
1 name@domain.com  
2  
3 name.2@domain.com  
4  
5 name-3@sub.domain.com  
6  
7 name-4@sub-2.domain.com  
8
```

Regex Previewer

Regex Previewer shows the current regular expression's matches in a side-by-side document.
